

UPMC Hamot

FREE Colorectal Screening Kits

Get tested. The life you
save could be yours.

Colorectal cancer is the second-leading cause of cancer death in the United States when men and women are combined, yet it can be prevented or detected at an early stage. If you're 50 or older, get tested. Regular screening and early detection can save lives.

In support of Colon Cancer Awareness Month, **UPMC Hamot will be providing free colon cancer screening kits (FIT kit).**
No appointment necessary.
