UPMCHorizon.com

UPMC Horizon is a 196-bed, full-service teaching hospital with campuses in Farrell and Greenville. Strengthened by the resources of UPMC, UPMC Horizon prides itself on providing high-quality patient care and specialized services in a community hospital setting.

The hospital’s beginnings trace back more than a century ago, when Greenville Hospital, later Greenville Regional Hospital, was founded in 1906. The former Shenango Valley Osteopathic Hospital, later the Shenango Valley Medical Center, opened in 1960. In 1992, the two hospitals merged to form Horizon Health System, which merged with UPMC in 1998.

UPMC Horizon’s two hospital campuses and network of satellite locations and affiliated physician offices throughout Mercer, Lawrence, and Crawford counties in Pennsylvania and Trumbull and Ashtabula counties in Ohio offer seamless access to primary care and specialty services to its patients.

UPMC is an equal opportunity employer. UPMC policy prohibits discrimination or harassment on the basis of race, color, religion, ancestry, national origin, age, sex, genetics, sexual orientation, marital status, familial status, disability, veteran status, or any other legally protected group status. Further, UPMC will continue to support and promote equal employment opportunity, human dignity, and racial, ethnic, and cultural diversity. This policy applies to admissions, employment, and access to and treatment in UPMC programs and activities. This commitment is made by UPMC in accordance with federal, state, and/or local laws and regulations.

ABOUT UPMC HORIZON

Centers of Excellence

Bariatric Surgery
UPMC Horizon has been named a Bariatric Surgery Center of Excellence by the American Society for Metabolic and Bariatric Surgery (ASMBS). This designation recognizes surgical programs with a demonstrated track record of favorable outcomes in bariatric surgery.

Breast Imaging
The Womancare Center of UPMC Horizon is accredited by the American College of Radiology (ACR) and designated as a Breast Imaging Center of Excellence.

eRecord
UPMC Horizon recently implemented eRecord, UPMC's electronic system of patient medical records, at its Shenango Valley and Greenville campuses, as well as its Community Medicine Inc. practices.

The hospital achieved Stage 6 designation of the HIMSS Analytics Electronic Medical Record Adoption Model™, a distinction that honors efforts to implement technology to improve patient safety and quality care.

UPMC CancerCenter at UPMC Horizon
UPMC CancerCenter, partner with University of Pittsburgh Cancer Institute, at UPMC Horizon provides high-quality cancer care to residents in Mercer County. Patients have access to cancer-fighting tools and techniques, including targeted radiation treatments, advanced anti-cancer drugs, and the latest cancer clinical trials. These services are complemented by a cancer care team that understands the importance of comprehensive support, as well as the dynamic communities served by UPMC Horizon.

Womancare Center of UPMC Horizon

UPMC Horizon’s Womancare Center, located in Hermitage, combines the values, mission, and vision of UPMC with the passion of Magee-Womens Hospital of UPMC to provide quality health care to women and their families. Through its resources, the Womancare Center offers advanced technology, a direct link to research and educational programs, and a standard of care based on Magee-Womens Hospital, a nationally-renowned women’s health institution. The center includes multiple services, including diagnostic imaging; a variety of specialty physician offices, ongoing community education programs, a focus on wellness and prevention, and partnerships with outside agencies to advance the level of services available for women across their lifespan.

Greenville Medical Center—UPMC
Greenville Medical Center—UPMC provides access to multiple primary care and specialty physician practices, as well as lab and diagnostic imaging services, under one roof.

Satellite Locations
In addition to the Womancare Center and Greenville Medical Center—UPMC, UPMC Horizon offers outpatient imaging and laboratory services in New Wilmington and Mercer. Through Community Medicine Inc., UPMC Horizon provides access to primary care and specialty physician offices in Hermitage, Sharpsville, West Middlesex, Mercer, Greenville, New Castle, Linesville, and Kamiarn, Ohio. UPMC Urgent Care at Hermitage provides Occupational Medicine, laboratory, and imaging services.

Surgical Services at UPMC Horizon

With a wide range of available surgical specialties and significant investments in facilities and technology, UPMC Horizon is the destination for world-class surgical care in the Mercer County region. From general surgery to specialties including bariatric, breast, thoracic, orthopaedic, and vascular surgery, UPMC Horizon offers a quality, patient-centered experience from the preoperative testing phase to recovery. The recently upgraded surgery department at the Greenville campus includes operating rooms specifically designed for minimally invasive surgery, an ambulatory surgery suite featuring high-definition endoscopy equipment, and a newly-renovated postanesthesia care unit. Inpatient and outpatient surgical services, along with ambulatory services and endoscopy procedures, are available at both the Greenville and Shenango Valley campuses.

ACADEMICS

Residency Programs
UPMC Horizon has offered postgraduate medical education programs since 1962. The hospital currently offers residency programs in family medicine, internal medicine, and general surgery. All programs are approved by the American Osteopathic Association. A low resident-to-physician ratio allows residents to establish close, personal relationships with their mentors. From the very beginning of their training, residents participate in hands-on patient treatment and assume responsibility for their patients’ health and well-being. After graduating from the program, many of UPMC Horizon’s residents go on to join practices in the hospital’s service area.

Hospitalist Service
UPMC Horizon offers one of the fastest growing trends in health care, a hospitalist program, that consists of a dedicated physician/group of physicians — hospitalist(s) — who see patients admitted to UPMC Horizon. The physicians in UPMC Horizon’s hospitalist program are employed by UPMC Horizon and coordinate all aspects of a patient’s care, including communication with their primary care physician, during their hospital stay and at discharge.
