The experts of the Magee-Womens Cancer Program, part of UPMC CancerCenter, offer the Women’s Cancer Education Series to provide you and your loved ones with the latest information on women’s cancer.

The Women’s Cancer Education Series is for anyone seeking up-to-date information about women’s cancer — whether newly diagnosed or long-time survivors, their family and friends, and women and their family members who are concerned about the disease.

Experts present on a variety of topics related to women’s cancer, followed by a question and answer session. Participants have the opportunity to learn from women’s cancer experts, as well as from other participants’ experiences and exchange of information.

---
