Magee-Womens Health Services in your community.

Bringing the best in women’s health care to Monroeville, McKeesport, and neighboring communities.
A Message to Your Community

In our region, we are fortunate to have Magee-Womens Hospital of UPMC — one of the country’s top-ranked medical and research centers for women’s health care — so close by. And, thanks to the partnership with UPMC East and UPMC McKeesport, women of all ages in Pittsburgh’s Monroeville, McKeesport, and surrounding communities now can enjoy even greater access to Magee’s trusted expertise.

Magee-Womens Health Services provides a wide range of comprehensive diagnostic, surgical, and outpatient services, led by specialists who are recognized innovators and leaders in women’s health. Services are delivered right on the campuses of UPMC East and UPMC McKeesport, and at convenient specialty locations in the community.

Whether you’re an adolescent preparing for your first gynecological examination … a mother-to-be readying for childbirth … or a midlife woman going through menopause, you’ll find expert, high-quality medical care focused on your unique needs during this special time of your life.

For generations, our hospitals have proudly served women with respect and dignity. Magee-Womens Health Services in the Monroeville and McKeesport communities continues that tradition of patient-and family-centered care, supporting your health needs and quality of life in every way.

Women’s Imaging Services

Residents of the Monroeville and McKeesport communities have easy access to state-of-the-art specialized women’s imaging services conveniently offered at UPMC East, the Magee Womancare Center in the Corporate One Office Park in Monroeville, and Magee Imaging Services at UPMC McKeesport. Each location offers state-of-the-art imaging tailored to each patient’s health care needs.

Denise Chough, MD
Associate Clinical Professor of Radiology
Magee-Womens Hospital of UPMC

“With the latest equipment and our highly trained staff, we strive to detect breast cancer at its earliest and most treatable stage.”

- Denise Chough, MD

Specialized imaging services available at our Monroeville locations include:
- 3D Mammography (Tomosynthesis) — Screening and Diagnostic
- Bone Densitometry (DXA)
- Breast Ultrasound
- OB-GYN Ultrasound Services
- Radioactive Seed Localization (RSL)
- Ultrasound-guided and Stereotactic-guided Breast Biopsies

Specialized imaging services available at our McKeesport locations include:
- 3D Mammography (Tomosynthesis) — Screening and Diagnostic
- Bone Densitometry (DXA)
- Breast Ultrasound
- OB-GYN Ultrasound Services
- Radioactive Seed Localization (RSL)
- Ultrasound-guided Breast Biopsies
Breast Surgery in Your Community

“Our breast program is focused on providing individualized care for patients with benign and malignant breast problems. We strive to deliver cutting-edge care by using the latest surgical techniques and offering access to a comprehensive, multidisciplinary team.”

- Emilia Diego, MD
  Section Chief of Breast Surgery
  Director, Pre-Menopausal Breast Cancer Services
  Magee-Womens Hospital of UPMC

Magee has played a leading role in many of the dramatic advancements in the diagnosis and treatment of breast cancer. Women now have access to innovative, less invasive breast surgery options that can mean less scarring, faster healing time, and better cosmetic results.

When you are referred to the breast surgery program, you’ll undergo an initial evaluation, including a physical examination and complete clinical breast exam. If you require additional treatment, our nationally recognized, board-certified breast surgeons and multidisciplinary team of doctors will work with you to develop a comprehensive, personalized plan of care.

Breast Surgery Options for Women
These breast surgery options are available in your community:

• Breast biopsy — removal of a breast tissue sample to test for cancer
• Lumpectomy — surgical removal of a portion of the breast to remove a known cancer
• Oncoplastic surgery — reshaping of the breast after a lumpectomy or partial mastectomy
• Sentinel lymph node biopsy — removal of the main (sentinel) lymph nodes in the underarm (axilla) to test for cancer
• Axillary lymph node dissection — removal of all or a group of lymph nodes in the underarm (axilla)
General Obstetrics & Gynecology

“The region's leading provider of women's health services, Magee-Womens Hospital of UPMC is a world-class center for both women's health and comprehensive medical and surgical services.”

-Robert Edwards, MD
Professor and Chair, Department of Obstetrics, Gynecology, and Reproductive Sciences
University of Pittsburgh/Magee-Womens Hospital of UPMC

For more than a century, Magee has been the name to trust in women’s health. From yearly checkups and specialized care to the testing, diagnosis, and advanced treatment of complex and difficult cases, our board-certified doctors, experienced nurses, and skilled support staff can meet your specific needs at every stage of life.

Having Magee’s expertise and technology available in Monroeville and McKeensport makes it easier, more convenient, and more manageable for you to get this state-of-the-art care.

As one of the nation’s leading hospitals specializing in women’s health, Magee combines a wealth of specialty services with a traditional focus on obstetrics and gynecology. Magee is also recognized as a national Center of Excellence in Women's Health by the U.S. Department of Health and Human Services.
“We work with each woman to maximize her health, well-being, and quality of life through the menopause transition and beyond.”

- Amy K. Imro, MD
  Assistant Professor, Department of Obstetrics, Gynecology, and Reproductive Sciences
  The Midlife Health Center
  Magee-Womens Hospital of UPMC

Midlife is a time of natural transition in a woman’s life. It brings major changes as her body prepares for menopause and the end of her reproductive years. Like other phases of life — adolescence, pregnancy, and postpartum — the body must adjust to different levels of hormones.

Our midlife health services program, offered through Magee-Womens Health Services in Monroeville, can help you prepare for menopause, navigate changes, and embrace the many years of good health and joy to come. Our doctors from the Women’s Midlife Health Center at Magee offer specialized care for women in premature menopause, perimenopause, and menopause.

We provide expertise in the management of menopausal symptoms, such as hot flashes, night sweats, insomnia, vaginal dryness, and decreased sexual desire. We provide well-woman gynecologic care for midlife women who are healthy, as well as women with more complex needs.

**Symptoms We Treat**
We specialize in addressing the health care and concerns of women over 35, including:

- Bleeding
- Hormone imbalance related to menopause
- Hot flashes/night sweats
- Irregular bleeding
- Menopause
- Pain with intercourse
Minimally Invasive Gynecologic Surgery

If you have a gynecologic condition that requires an operation, minimally invasive surgery may be the right option for you. Compared to traditional procedures, minimally invasive surgery is generally preferred because patients usually return to work sooner, experience less pain after surgery, have less scar tissue formation, and have smaller skin incisions.

Our highly trained surgeons use the latest laparoscopic and hysteroscopic technologies to treat a wide range of gynecologic conditions, including complex and difficult-to-treat cases, such as:

- Abnormal bleeding (heavy periods)
- Endometriosis
- Fibroid tumors
- Incontinence
- Infertility
- Ovarian cysts
- Pelvic organ prolapse
- Pelvic pain

Same-Day Hysterectomy
Our use of state-of-the-art technology means Magee-Womens Health Services at UPMC East, the UPMC Monroeville Surgery Center, and UPMC McKeesport can offer women same-day laparoscopic hysterectomy as a minimally invasive procedure.

With outpatient hysterectomy, our surgeons make just four quarter-inch size incisions in the abdomen. This allows you to go home the same day, with a typical recovery time of two weeks. Traditional surgery involves two large incisions, with an average six-week recovery time for most patients.

Minimally invasive gynecologic surgery is offered by specialized surgeons within the following practices in Monroeville and McKeesport:

- Monroeville: Magee Womancare Associates
- McKeesport: University NIA Ob/Gyn Associates
Urogynecology Services

Women of all ages can experience bladder and pelvic floor disorders, including problems with bladder and bowel control. Although such problems are more common with advancing age, even young women can be affected.

Childbirth, heavy lifting, the effects of menopause and aging, and some chronic medical and neurologic conditions can weaken the pelvic floor, causing leakage of urine or stool, difficulty with bowel movements, and pelvic pain or pressure. Discomfort and embarrassment resulting from these disorders can lead to depression, social isolation, and avoidance of physical and sexual activity.

If you’re experiencing any of these problems, our urogynecology specialists can help restore your confidence and active lifestyle. We use the most current research and clinical standards to diagnose and treat pelvic floor disorders and other urogynecologic conditions.

Urogynecologic Conditions We Treat

- Chronic urinary tract infections
- Dropping of the uterus, bladder, rectum, or intestine
- Fecal incontinence (passing of gas or stool involuntarily)
- Overactive bladder symptoms
- Pelvic organ prolapse (weakening of the pelvic muscles)
- Pelvic pain
- Urinary incontinence (leaking of urine)
- Voiding disorders, such as urinary retention

“We are passionate about helping women whose quality of life has been impacted by pelvic floor disorders. All women deserve personalized and compassionate care to address their urogynecologic conditions.”

- Megan Bradley, MD
  Assistant Professor, Division of Urogynecology and Pelvic Reconstruction Surgery
  Magee-Womens Hospital of UPMC

Megan Bradley, MD
Women’s Cancer Services

“We are committed to providing world-class care to the community by offering facilities available close to home so treatment is more convenient and less stressful for our patients.”

- Rajesh Sehgal, MD
  Vice President of Medical Affairs
  Division Chief of Hematology and Oncology
  UPMC East

UPMC Hillman Cancer Center is one of the largest integrated community networks of cancer doctors and health care specialists in the country.

There is a UPMC Hillman Cancer Center in Monroeville (part of Magee-Women’s Hospital of UPMC), and at UPMC East and UPMC McKeepson. Each provides specialized cancer care to the Monroeville and the McKeesport communities. Our network of doctors and specialists allows us to provide patients with access to the latest advancements in cancer prevention, detection, diagnosis, staging, and treatment, as well experimental treatments at convenient, community-based locations.

Committed to advancing cancer care, our oncologists work closely with specialists from other UPMC Hillman Cancer Center locations. Through weekly reviews and patient conferences, our dedicated doctors strive to develop individualized, comprehensive treatment plans for each cancer patient.

Women’s Cancer Services available to the Monroeville and McKeesport communities include:

- Breast Evaluation and Surgery
- Gynecologic Oncology Evaluation
- Medical Oncology — UPMC Hillman Cancer Center
- Radiation Oncology — UPMC Hillman Cancer Center
- Women’s Imaging
