

UPMC has adopted the guidelines of the Health Information Technology for Economic and Clinical Health (HITECH) Act.

In the cases where UPMC has implemented an electronic health record, the Act provides individuals with a right to obtain their health information in an electronic format. UPMC has the capability to release electronic records on a compact disc.

The Act provides that only a fee equal to the labor cost can be charged for an electronic request. UPMC's policy is to charge only for labor which is a reduced cost compared to services provided on paper.

Documentation that is housed on paper or that's released on paper will continue to be invoiced based on the Pennsylvania State Department of Health rates.

Please view the following list of implementation dates to determine if your health information is a candidate for electronic release.

Save a buck and a tree.
