

STUDENTS' COMMENTS REGARDING THE VIRTUAL CLASSROOM AND CLINICAL EXPERIENCES:

"I would like to take a moment and personally thank you all for EVERYTHING that you have done for us students to be able to continue our education through this difficult time. I myself greatly appreciate it and I think you all did an outstanding job getting all of this information prepped and in order for us to start today. Today I had my first day of virtual clinical. I feel it was a very beneficial experience with exposure to information we had to put into play in a real-life scenario that helped us understand the material better and i truly feel it will help us on our next upcoming exam. So, thank you very much from the bottom of my heart. I greatly appreciate all of the hard work you all put into our new process of continuing our education."

"We appreciate the support and the transparency from the administration. We are eager to keep progressing successfully and become nurses and join the fight one day."

"Thank you. I'm blessed to be home with him because of you guys. I still work but I work midnights at two hospital ED/COVID units. but you all are the reason we are continuing to succeed."

"I feel our faculty in 301A have really tried their best in making this transition as smooth as possible. The first exam remotely last evening felt the same as it does in person and I personally saw no issues with it. The lectures are a bit more difficult after a long day staring at the screen but we are all going to do the best we can."

"We couldn't have done it without all of you!! Thank you!!"

"I would like to thank all the faculty, they have been amazing. Transitioning into an online format in such a short time, and never skipping a beat."

"Online learning can be a challenge, but the program did a great job incorporating concepts throughout the clinical scenarios, which enhanced the learning process."

"Teams for class and clinical allowed faculty and students to have active dialog and stay connected throughout the day."

"Faculty are the hero's, transitioning our program into an online format in such a short period of time was amazing. Learning did still occur."
