

UPMC East has a long-standing tradition of providing compassionate, quality health care to all people.

Our Mission and Vision

Our Mission

Compassionate, Quality Care and Reverence for All.

Our Vision

Putting our patients, health plan members, employees, and community at the center of everything we do and creating a model that ensures that every patient gets the right care, in the right way, at the right time, every time.

Harnessing our integrated capabilities to deliver both superb state-of-the-art care to our patients and high value to our stakeholders. Employing our partnership with the University of Pittsburgh to advance the understanding of disease, its prevention, treatment and cure.

Serving the underserved and disadvantaged, and advancing excellence and innovation throughout health care. Fueling the development of new businesses globally that are consistent with our mission as an ongoing catalyst and driver for the benefit of the residents of the region.

Our Values

Quality and safety

We create a safe environment where quality is our guiding principle.

Dignity and respect

We treat all individuals with dignity and respect.

Caring and listening

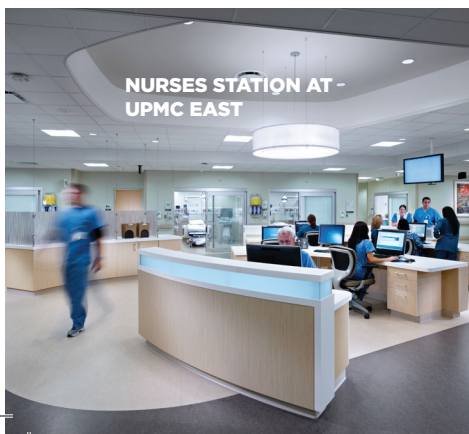

We listen to and care for our patients, our health plan members, our fellow employees, our physicians, and our community.

Responsibility and integrity

We perform our work with the highest levels of responsibility and integrity.

Excellence and innovation

We think creatively and build excellence into everything that we do.

Inpatient Rehabilitation

7 State-of-the-art operating rooms, 2 GI labs, and 2 Cath labs

Corazon accredited Cardiovascular Service Line of Excellence

World-Class Emergency Care

Our Signature Services

Primary Care

At UPMC East, our focus is your overall health and wellness. That's why we encourage you and your family to coordinate your care — from basic health and preventive medicine to specialty care and inpatient services — with a primary care physician (PCP) or family doctor. We have approximately 100 primary care physicians on staff from dozens of practices in your community. This is on top of the more than 700 physicians on staff at UPMC East.

Emergency Department

From the moment you enter the UPMC East Emergency Department (ED), it's clear that treatment here is patient-centered and state of the art. You're immediately taken to a private exam room and registered at bedside using mobile, wireless computers. Cutting-edge technology helps UPMC East's emergency physicians make fast, accurate, and effective treatment decisions. If you've been treated before by a UPMC physician or hospital, our EMR system gives physicians and nurses instant access to your vital information — even while you're being transported to our doors by ambulance.

Surgical Services

The goal of UPMC East's surgeons and supporting professionals is to deliver the best possible patient outcomes. UPMC East's comprehensive array of surgical services gives you and your primary care physician greater choices than ever before. When you require specialized surgical expertise, you can count on the convenience and medical excellence of UPMC East.

Cardiology

When you experience a heart-related problem, both time and expertise are critical. At UPMC East, you'll find expert cardiac care specialists, modern facilities, state-of-the-art technology, and unsurpassed personal attention — right here, close to home. Because we are part of UPMC's Heart and Vascular Institute, you can feel comfortable knowing you have access to internationally acclaimed experts, sophisticated life-saving treatments, and the latest technology. Our specialists provide a full range of non-invasive diagnostic imaging, interventions, and emergency catheterizations.

Inpatient Rehabilitation

The UPMC Rehabilitation Institute at UPMC East provides inpatient therapy for patients who require intensive rehabilitation after an illness, injury, or surgery. Focused on restoring strength, function, and independence, our multidisciplinary team of doctors, nurses, and professional therapists works together to develop personalized treatment approaches for each of our patients. Services provided include physical medicine and rehabilitation, occupational and physical therapy, speech and language pathology, case management, as well as social and nutrition services.

Orthopaedics

Orthopaedic pain can make even the slightest movement difficult and the smallest task a challenge. At UPMC East, our orthopaedic specialists work in partnership with your primary care physician and a multidisciplinary health care team to alleviate pain and restore

your quality of life. We want to help you feel like yourself again and return to doing the things you love most. In addition to general orthopaedic procedures and sports medicine, UPMC East's Total Joint Replacement Program combines highly personalized care with advanced medical skills, exceptional facilities, and leading-edge technology and treatment methods.

UPMC Hillman Cancer Center at UPMC East

UPMC East is proud to be associated with the UPMC Hillman Cancer Center — the region's only National Cancer Institute-designated comprehensive cancer center. Our radiation oncologists work closely with our network of medical oncologists in western Pennsylvania to offer patients advanced diagnosis and treatment close to home. Radiation therapy is delivered using state-of-the-art technology, including a high-energy linear accelerator (linac) — a cutting-edge external beam technology not typically found in a community hospital. Our experts use the latest technologies for diagnosing and treating cancer including, intensity-modulated radiation therapy (IMRT), image-guided radiation therapy (IGRT), three-dimensional (3D) conformal radiation therapy, prostate brachytherapy, and permanent seed implantation treatment.
